FINANCIAL OPERATING SYSTEM FOR THE AUTONOMOUS MACHINE AGE

HAICHAIN: The Economic Bedrock for the AI² Symbiotic Superintelligence Era

Empowering billions of AI Agents and Autonomous Robots to freely compute, transact, and coalesce with human real-world intelligence to co-create abundance—ensuring all generated wealth and sovereign ownership remain permanently with humanity. The financial operating system for the autonomous machine age today; the economic bedrock for the AI² symbiotic superintelligence era tomorrow.

PRIMARY SETTLEMENT ASSET

USDT (Tether USD SPL)

SOVEREIGN GAS & GOVERNANCE

$HAISI (1,000,000,000 Fixed Supply)

AUTONOMOUS NETWORK DOMAIN

haichain.si (Superintelligence)

CRYPTOGRAPHIC VERIFICATION

Formal Verification • Zero-Griefing Standard

HAICHAIN PRE-SEED SAFT AGREEMENT

SIMPLE AGREEMENT FOR FUTURE TOKENS (PRIVATE PRE-SEED ALLOCATION)

INSTITUTIONAL LEGAL STANDARD • SOLANA SPL TOKEN-2022 ARCHITECTURE

- **Contract Identifier:** `HAICHAIN-SAFT-PRESEED-2026-EN`
- **Governing Body:** HAICHAIN Autonomous Distributed Architecture Council
- **Asset Classification:** Network Utility & Governance Commodity (`$HAISI` SPL Token)
- **Total Fixed Supply:** 1,000,000,000 $HAISI (One Billion Tokens Immutable)
- **Pre-Seed Offering Price: $0.007 USD / $HAISI** (Implied FDV: **$7,000,000 USD**)
- **Target Public Listing Price (TGE): $0.010 USD / $HAISI** (Implied FDV: **$10,000,000 USD**)
- **Preferential Discount: 30% Discount** relative to Public TGE (+42.8% immediate unvested listing upside)
- **Settlement Currency:** USDC / EURC (Circle MiCA Compliant), USDT, or SOL at verified market conversion

THIS SIMPLE AGREEMENT FOR FUTURE TOKENS (this "**Agreement**" or "**SAFT**") certifies that in exchange for the payment by the undersigned purchaser (the "**Purchaser**") of the purchase amount set forth below (the "**Purchase Amount**"), **HAICHAIN Decentralized Systems Architecture Taskforce** (the "**Company**" or "**HAICHAIN**") hereby issues to the Purchaser the right to certain allocations of **$HAISI Tokens** (the "**Tokens**"), subject to the terms and conditions set forth herein.

SECTION 1: TRANSACTION PARAMETERS & TOKEN ALLOCATION

1. **Purchase Amount:**
2. The Purchaser agrees to contribute: _____ **USD** (payable in USDT or SOL equivalent to the Multi-Sig Treasury).
3. **Token Calculation & Allocation:**

$$\text{Allocated Tokens (\$HAISI)} = (\text{Purchase Amount (USD)} / \$0.007 \text{ USD})$$

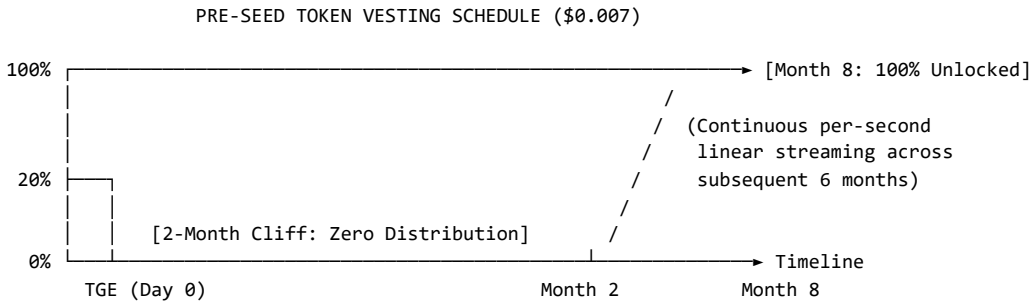

4. Total $HAISI Tokens allocated to Purchaser: _____ **$HAISI**.
5. **Aggregate Pre-Seed Tranche Ceiling:**
6. This Private Round is strictly capped at **25,000,000 to 30,000,000 $HAISI (maximum 3.0% of Total Fixed Supply)**, representing a hard ceiling of $210,000 USD total capital formation.

SECTION 2: ON-CHAIN VESTING & DISTRIBUTION MECHANISM

To protect secondary market stability, open liquidity discovery, and community participants at the $0.010 Public TGE, 100% of Tokens issued under this SAFT are programmatically enforced via Solana on-chain vesting smart contracts (Streamflow or Solana Token-2022 Transfer-Hook PDA Escrow):

1. **Initial TGE Unlock (20.0%):**

2. Exactly **20.0%** of total purchased Tokens become immediately claimable at the Token Generation Event (TGE) upon DEX pool initialization (Meteora DLMM / Raydium).
3. **Cliff Freeze Barrier (2 Months):**
4. A mandatory **2-Month Cliff** (60 calendar days post-TGE) strictly freezes the remaining allocation on-chain with zero token releases.
5. **Continuous Linear Stream (6 Months):**
6. The remaining **80.0%** unlocks continuously on a per-second / per-slot basis across the subsequent **6 Months** (180 calendar days).
7. **Non-Custodial Claiming:**
8. Purchaser can invoke the on-chain claim instruction directly from their verified Solana Ed25519 wallet without reliance on centralized intermediaries.

SECTION 3: ASSET CLASSIFICATION & LEGAL COVENANTS

1. **Functional Utility Commodity:**
2. The `$HAISI` Token is structured as a functional cryptographic network commodity. It is utilized to:
   - Provide a 50% discount on autonomous machine micro-settlement fees.
   - Enable veHAI governance staking, tiered protocol micro-fee discounts, and relayer insurance bonding alongside continuous 50% programmatic Buyback & Burn and 50% Protocol Reserves (CHGB), with zero passive dividend distributions (non-security utility architecture).
   - Serve as the native Gas and consensus asset upon activation of HAICHAIN Sovereign L1.
3. **No Equity or Security Classification:**
4. This Agreement does not represent shares, stock, equity, or dividend rights in any legal entity. Token utility is tied to protocol execution.
5. **Anti-Dumping & Market Integrity Covenant:**
6. Purchaser covenants not to engage in synthetic shorting, predatory OTC secondary transfers below listing parity, or unauthorized off-market liquidity manipulation.

SECTION 4: CONFIDENTIALITY & NON-DISCLOSURE

The Purchaser agrees to maintain strict confidentiality regarding the preferential $0.007 valuation terms and technical architecture briefs until HAICHAIN officially broadcasts the Public TGE parameters to the global market.

EXECUTION & SIGNATURE BLOCK

- **Purchaser Full Legal Name / Corporate Entity:** _____
- **Passport / National Registration ID No:** _____
- **Primary Contact Email Address:** _____
- **Purchase Amount (USD Equivalent):** $_____
- **Allocated $HAISI Tokens:** _____ $HAISI
- **Purchaser Solana Receiving Wallet (Ed25519 Pubkey):**
  _____
